

## **Requirements for the QAMP® Certification**

The QAMP® certificate attests to the holder's broad understanding in the field of software quality assurance management. To obtain the QAMP® certification, the applicant must submit sufficient evidence of this understanding along with the application for certification.

## **Validity of the certificate**

QAMP® supports lifelong learning; therefore, a two-year re-certification is required to demonstrate new knowledge and experience.

The certificate is valid for 24 months from the date of issue.

The certified person will be reminded by iSQI by e-mail 3 months before the certificate expires to renew the certification.

## **Application Process**

The application forms for QAMP® certification can be downloaded from the iSQI website:

- [QAMP® basic certification](#)
- [QAMP® re-certification](#)

The application must be completed, signed and sent to [exam@isqi.org](mailto:exam@isqi.org). Suitable supporting documents must be attached to the application as proof of the specified qualifications.

The current basic or re-certification fee can be found in the [iSQI Webshop](#). Payment is made directly when ordering in the iSQI Webshop. Alternatively, payment by invoice can be selected in the certification application.

The application will be processed after receipt of the certification fee.

## Proof of qualification for re-certification

As QAMP® supports lifelong learning, a two-year re-certification is required, during which new evidence of knowledge and experience must be provided.

This proof can be provided by:

- further **certification** examinations passed since the last QAMP certification,
- further **professional activity** in one of the areas mentioned,
- the **publication** of specialist articles or books,
- Attendance at specialist **conferences\*** (at least 2 days conference program),
- Participation in a **tutorial / workshop** at a specialist conference\*,
- **Active participation** in the specialist group or working group of a board (e.g. an ISTQB member board, an IREB community, the ISAQB or in an ASQF specialist group)

For the **recognition of further certifications**, the candidate must submit a copy of the certificate obtained.

For **recognition of professional activity**, a certificate must be signed by the applicant's employer or project manager on the application form.

Suitable evidence must be provided for the **publication of articles** or **collaboration on books**.

Suitable proof, e.g. the ticket, booking confirmation or confirmation of participation, attended program, must be submitted for **attendance at specialist conferences** or **participation in a workshop** or tutorial.

**Participation in a specialist group** must also be evidenced by suitable proof (e.g. LinkedIn profile).

*\*Recognised specialist conferences include: Agile Heroes Festival, BMPK (Serview Summit), Eurostar, German Testing Day, Informatik Festival, Manage Agile, Modern RE, OOP, ReConf, Seetest, Software Architecture Gathering, Software Quality Days, Swiss Testing Day, Testing United.*

*Attendance at other specialist conferences can be recognised by iSQI as proof of qualification. In addition to proof of participation, applicants must enclose the program (link to website if applicable) of the conference attended with their application.*

## GUIDELINES FOR RE-CERTIFICATION

**QAMP®: Quality Assurance Management Professional**

**All certificates can be combined and in this case each counts as 50% of the qualification to be obtained.**

The following combinations are permitted:

- a) Two new certifications
  
- b) One new certification  
**plus**
  - A minimum of 9 months practical experience **or**
  - Publication of a specialist article or collaboration on a specialist book **or**
  - Attendance at a specialist conference or participation in a tutorial or workshop **or**
  - At least 12 months participation in a working group
  
- c) 18 months of practical experience
  
- d) 9 months of practical experience  
**plus**
  - One new certification **or**
  - Publication of a specialist article or collaboration on a specialist book **or**
  - Attendance at a specialist conference or participation in a tutorial or workshop **or**
  - At least 12 months participation in a working group

The iSQI team will use the documents submitted to check whether the requirements for obtaining QAMP® basic or re-certification have been met.

If the documents submitted do not fulfil the necessary requirements, iSQI will request further evidence of the specified qualifications.

If the relevant requirements are met, iSQI will issue the certificate. The applicant will be sent a digital certificate to download and a digital badge will be issued. If a printed certificate was ordered with the application, it will usually be sent by post within four weeks.

## **APPENDIX I**

The following certifications(\*) are recognised as specialisations for the QAMP® basic certification or as additional qualifications as part of the QAMP® re-certification.

- A4Q Business Service Design Foundation Level
- A4Q Certificate in Business Acumen
- A4Q Certified Selenium Tester
- A4Q Certified Selenium 4 Tester
- A4Q Customer Experience (CX) Analysis Foundation Level
- A4Q Certified Service Designer
- A4Q Design Thinking Foundation Level
- A4Q IQBBA Certified Agile Business Analysis
- A4Q IQBBA Certified Foundation Level Business Analysis
- A4Q Foundation Level Tester for Appium
- A4Q Practical Tester
- A4Q Practitioner in Agile Quality
- A4Q Security Essentials
- A4Q Service Design Consultancy
- A4Q Software Development Engineer in Test
- Advanced Product Owner by Nextnormal.Academy
- ASQF® Certified Professional for Project Management
- ASQF® Certified Professional for IoT
- ASQF® Secure Software Engineering
- Certified Professional for Medical Software
- DASA DevOps Fundamentals
- DASA DevOps Practitioner
- Digital Design Professional
- GTB® CTFL Test Dat Specialist
- IFPUG™ Certified SNAP Practitioner CSP
- Lean Six Sigma Academy - Yellow Belt
- Lean Six Sigma Academy - Orange Belt
- Lean Six Sigma Academy - Green Belt
- Lean Six Sigma Academy - Black Belt
- iSAQB CPSA® Certified Professional for Software Architecture Foundation Level
- iSAQB CPSA® Certified Professional for Software Architecture Advanced Level
- iSQI® Certified Agile Business Analysis (CABA)
- iSQI® Certified Agile Essentials

## GUIDELINES FOR RE-CERTIFICATION

**QAMP®: Quality Assurance Management Professional**
