

### Target group

People from RE, BA, business engineering, software- and system development as well as existing roles from the agile community (Product Owner, Scrum Master, developer), who want to deepen their knowledge in dealing with requirements.

### Costs

Costs for training and examination can be requested from our recognized training providers or certification bodies.

### Languages

EN, GER, PT (BR)

### Exam

#### Practitioner | Level 2

75-minute multiple-choice test

#### Specialist | Level 3

Written assignment showcasing practical application of learned skills in the candidate's workplace.

### Contents

The RE@Agile module provides skills to apply RE methods in agile development processes. It supports RE experts in agile environments on the one hand and agile teams in the targeted use of RE tools on the other hand.

#### The module provides the skills to:

- successfully plan, implement and perform RE techniques and methods in agile projects
- successfully plan, implement and perform techniques and methods from Agile approaches in RE
- combine Agile approaches and RE techniques to the benefit of all stakeholders
- correctly use the terminology of RE in an Agile context

### Prerequisites

#### Practitioner | Level 2

CPRE RE@Agile Primer certificate or  
CPRE Level 1 (Foundation Level) certificate or  
BCS Practitioner in RE certificate or  
Selected PO certificates ([see exam regulations](#))

#### Specialist | Level 3

CPRE RE@Agile Practitioner certificate
